Languages: Java, Dart, JavaScript, Python, C++
Frameworks: Flutter, React.js, Next.js, Node.js, Express.js, Firebase, Supabase, Tailwind CSS

Tools: Git, GitHub, Figma, VS Code, Retrofit, GetIt, Hive, Mockito, Postman, Vercel

Core Areas: App Development, UI/UX Design, API Integration, Generative AI, Cloud Deployment, Agile, Testing, CRM Development, E-Commerce Platforms

Experience

Founding Full Stack Developer

Jan 2026 – May 2026

ArogyaBio OPC Pvt Ltd

- Worked as the first technical employee and handled complete product development for the startup.
- Developed and maintained the company's primary production e-commerce website for Ayurvedic product sales, customer engagement, and digital branding.
- Built a custom CRM platform for lead management, sales tracking, team workflows, and business operations.
- Developed an EMS portal for internal employee management and operational workflows.
- Managed Meta Ads technical integrations, landing page systems, and marketing automation workflows.
- Collaborated directly with founders on product strategy, technical architecture, branding, and startup scaling.

Freelance Full Stack Developer

2023 – Present

Remote

- Delivered 15+ full-stack web and mobile projects for clients in education, design, AI, automation, and business sectors.
- Developed Flutter-based mobile applications integrating REST APIs and Firebase services.
- Collaborated on product design and conducted UI/UX improvements aligned with brand aesthetics.
- Deployed production-ready apps using CI/CD pipelines and ensured performance optimization.

Projects

Arogya CRM

2026

Business Automation & CRM Platform

- Built complete CRM platform for lead management, sales tracking, employee workflows, and business operations.
- Implemented role-based dashboards, authentication systems, scalable backend architecture, and responsive admin interfaces.
- Technologies: React.js, Firebase, Supabase, Node.js, Tailwind CSS

ArogyaBio Main E-Commerce Website

2026

Production Business Website

- Developed and maintained the primary production website for ArogyaBio OPC Pvt Ltd focused on Ayurvedic healthcare product sales.
- Built responsive product pages, landing pages, product showcase systems, and conversion-focused UI/UX workflows.
- Integrated marketing funnels, business workflows, and performance-optimized frontend architecture.
- Technologies: React.js, Next.js, Firebase, Tailwind CSS, Vercel

Studio

2026

EMS / Digital Business Platform

- Developed a business-focused digital platform for internal workflows, employee operations, and service management.
 - Built scalable frontend systems, interactive UI components, and responsive design architecture.
 - Technologies: React.js, Firebase, Tailwind CSS
- Study Companion App (Emotion-Based)**
AI Flutter Mobile App

2025
- Built an AI-driven Flutter mobile app analyzing voice and facial emotion cues to provide personalized study or relaxation recommendations.
 - Integrated Firebase Authentication, Realtime Database, and ML-based emotion detection APIs.
 - Designed intuitive gamified interface for engagement and motivation tracking.
- Edify Learn Mindmap Generator**
Generative Learning Web App

2023 – 2025
- Engineered generative learning web app using React.js, Firebase, and OpenAI APIs.
 - Enabled users to generate interactive mindmaps from topics, track learning paths, and visualize AI summaries.
 - Built authentication, progress dashboards, and dynamic data rendering components.
- Personal Portfolio Website**
Flutter Web Portfolio

2024
- Designed and deployed a modern, responsive personal portfolio using Flutter Web.
 - Featured motion effects, project showcases, and GitHub-based CI deployment for live updates.
- Diagnose.AI**
Automated Health Screening Web App

2025
- Developed AI-based health-screening web app using React.js, Node.js, and deployed via Vercel/AWS.
 - Integrated user authentication, real-time image/video input pipelines, and predictive models to analyze visual symptoms.
 - Designed intuitive UI/UX for non-technical users and implemented CI/CD workflows for rapid deployment.

Education

- B.Tech in Computer Science & Engineering (AIML)**
GL Bajaj Group of Institutions, Mathura

2021 – 2025

Achievements

- Finalist – Solana HackDay (IIIT Delhi)
- Top Rank – iNeuron Hackathon (NIU)
- Member – Google Developer Student Club (GDSC)
- Campus Winner – Accenture Digital Innovators Challenge (2024)

Certifications

- Google Cloud: Vertex AI, Generative AI, and Responsible AI
- Flutter Development Bootcamp – AppBrewery
- UI/UX Design Essentials – Coursera (Google)
- HackerRank: Python (Basic), Problem Solving (Basic)
